*We have supplemented our Cyber awareness training with Glenda's unique style of presentation for many years -- to raving success. Her method of presenting cyber as not what could happen but rather what has actually happened, places the participant in a frame of mind that this could have been ME. By making cybersecurity personal and real, people walk away with a sense of healthy fear and a call to do better in their personal and professional lives.*

## Comments on Ms. Snodgrass' Presentations

*The presentation by The Net Effect's Glenda Snodgrass to our organization's annual meeting was the absolute best continuing education presentation at the meeting. This is not mere hyperbole. I had the opportunity to introduce Ms. Snodgrass and observe the entirety of her presentation. She was interesting and engaging. The subject was timely, and was of critical importance to every attendee. She spoke for an hour, and the group would have continued asking her questions if she had stayed for three hours. No one left the presentation. Afterward, several - more than ten - attendees sought me out to make sure I knew that they wanted her to come back next year for the annual meeting. I would recommend Ms. Snodgrass to any organization.*

Richard J. R. Raleigh Jr., President  
Alabama State Bar

*As the saying goes, "Anyone who is not a little paranoid is not sufficiently informed." Glenda gave our audience a healthy dose of needed paranoia on a subject critically important to lawyers who care about protecting client information and confidential communications. She is smart, articulate and knows her stuff. We have hosted her twice and hope to arrange for a third jolt of her hard-hitting, informed reality.*

Roy D. Campbell, III, President  
The Mississippi Bar
